## Day 2: Etosha Safari Lodge Gondwana Collection Namibia, Etosha South

---

### Etosha South

The **Etosha National Park** is a nature reserve in northern Namibia and one of the most important game reserves in Africa. It is by far the best-known national park in Namibia. Today the park covers an area of almost 22,300 km<sup>2</sup> and is completely fenced off, to protect the game!

In the park lies an approximately 5,000 km<sup>2</sup> large salt pan, which was formed by the drying out of the inland delta of the Kunene River and its shifting of the river bed about 2 million years ago.

By fencing the Etosha National Park, the animals living there are dependent on the available water and food supply. That is why the water supply takes place through water holes, some of which are of natural origin but are also supplied artificially.

Chobe Boat Cruises are a wonderful way to experience the Chobe National Park. Herds of elephants can be seen crossing the Chobe river into the island which is a spectacular sight to witness. Other animal species such as hippos and crocodiles can be seen lounging in the sun by the riverside. The boat cruises are available in a number of different options. The standard cruise boards approximately 30-40 people. The bigger boats feature a bar on board for refreshments while the smaller boats are perfect for bird watching. Boat cruises depart from the town of Kasane at either the morning or afternoon departures. A private boat cruise can be arranged for alternate times.

### Travel Information

Located in southwestern Africa, Namibia boasts a well-developed infrastructure, some of the best tourist facilities in Africa, and an impressive list of breathtaking natural wonders. Visitors can explore the capital of Windhoek and discover the lovely coastal town of Swakopmund boasting remnants of the country's German influence, reflected in the architecture, culture, cuisine and the annual Oktoberfest celebrations. To properly appreciate this extraordinary country, you will have to venture out of the cities to explore the remarkable natural landscapes Namibia has to offer. These include: the impressive Fish River Canyon; the vast Etosha National Park teeming with abundant wildlife, such as lions, desert-adapted elephants and the Hartmann's Mountain Zebra; the hauntingly beautiful Kalahari Desert; and of course the Namib Desert stretching for over 2000 km along the magnificent Atlantic Coast. Namibia is an ideal destination for travellers seeking an unforgettable African experience in a uniquely beautiful untamed wilderness.

### ***Entry Requirements***

#### **Passport and driving licence**

A journey can only start with a valid passport. Do check if the passports of all participants are valid for 6 more months from the date that you again depart from Namibia or Botswana.

Attention: When flying over and staying in South Africa and/or Botswana with children under 18 years it is required to have a unabridged birth certificate with you for these children. When a child travels with only one parent mentioned on the birth certificate it is required to have a written letter of consent with you of the parent not joining.

When one wants to rent a car the renter has to show a valid driving licence. Valid driving licences are: international drivers license, European Union driving licence, any national driving licence in English. National driving licences without mentioning in English "driving licence" must be accompanied by an officially certified translation in English. A driver needs to be at least 25 years old to be allowed to hire and drive a car.

### ***Banking and Currency***

#### **Currency**

Namibia uses the Namibian Dollar (N\$) this is linked on a one to one exchange with the South African Rand. The Rand is legal tender in Namibia, but the N\$ cannot be used in South Africa.

If you are wishing to purchase currency before arriving in Namibia, it is easiest to buy Rand as the Namibian Dollar is seldom available in banks outside of Namibia.

#### **Banking**

Banks are found in most towns, and are generally open from 09h00 to 15h30 on weekdays and 08h30 to 11h00 on Saturdays. Closed on Sundays and public holidays. Most of them offer foreign exchange services - with cash, bank and credit cards as well as travellers cheques.

You can also obtain cash from many of the ATMs. Several international banks have branches in main city centres. Always advise your bank that you are travelling outside of the country as they might block your purchases if they have not been informed.

#### **Money matters**

Master and Visa credit cards are in general accepted in Namibia. For money withdrawals at ATM's at the different banks (except Bank Windhoek) you can use the normal debit cards (Maestro).

In Botswana the Visa credit card is mostly accepted. Money withdrawals with normal debit cards are usually not possible. For Botswana it is recommended to take USD and/or EUR cash. For crossing the border of Zimbabwe and a visit to the Victoria Falls you will need USD.

### ***Travel, Transport and Getting Around***

Public transport in Namibia is geared towards the needs of the local populace, and is confined to main roads between major population centres. Although cheap and reliable, it is of little use to the traveller as most of Namibia's tourist attractions lie off the beaten track.

It is easy to travel around Namibia by car, and a 4WD vehicle is perfectly adequate both tarred and gravel roads. However, long distances, poor mobile phone coverage outside of main towns and infrequent petrol stations that only accept cash mean that planning ahead is vital.

There are major airlines that fly into Windhoek and Swakopmund. Other destinations are reachable by car or charter flight.

Namibians drive on the left and all signposts are in English. Seat belts must be worn at all times and talking in a mobile phone while driving is prohibited. The general speed limit is 100km/h on tarred roads outside of towns and 80km/h on gravel roads. In built up areas, the speed limit is 60km/h.

### ***Health and Medical Information***

#### **Travel healthy**

Beside taking the normal 'travel pharmacy' it is important to get informed about the necessary vaccinations. The DTP vaccination (Diphtheria, Tetanus en Polio) and Hepatitis A vaccination are recommended. The Hepatitis B en typhoid vaccination are only necessary depending on the nature, duration and length of the stay. A Yellow fever vaccination is only mandatory when travellers come from a yellow fever area.

During summer (December – April) the risk of getting malaria is higher than during wintertime (May – October). When you visit the far north of Namibia, the Caprivistrip, the Okavango Delta and/or the Victoria Falls in Zimbabwe, it is certainly recommended to take malaria prophylaxis. Also take necessary preventions, such as wearing protective clothes, and using anti-mosquito remedy, preferably with the ingredient DEET.

For professional advise contact your doctor or travel clinic.

### ***Food, Drink and Cuisine Advice***

Traditional Namibian cuisine is rarely served and so the food at restaurants tends to be European in style and is, generally, of a very high standard.

Namibia is very meat-orientated, and many menu options will feature steaks from various animals. However, there is usually a vegetarian and seafood section offered by most camps and restaurants.

In the supermarkets you'll find pre-wrapped fresh fruit and vegetables (though the more remote the areas you visit, the smaller your choice), and plenty of canned foods, pasta, rice, bread, etc. Most of this is imported from South Africa.

The water in Namibia's main towns is generally safe to drink, though it may taste a little metallic if it has been piped for miles. Natural sources should usually be purified, though water from underground springs and dry riverbeds seldom causes any problems. However, filtered and bottled water are readily available in most towns and all camps, lodges and hotels.

### *Climate and Weather*

Partially covered by the Namib Desert, one of the world's driest deserts, Namibia's climate is generally very dry and pleasant – it's fine to visit all year round. Namibia only receives a fraction of the rain experienced by countries further east. Between about **December to March** some days will be humid and rain may follow, often in localised, afternoon thunderstorms. These are more common in the centre and east of the country, and more unusual in the desert.

**April** and especially **May** are often lovely months in Namibia. Increasingly dry, with a real freshness in the air, and much greenery in the landscape; at this time the air is clear and largely free from dust.

From **June to August** Namibia cools down and dries out more; nights can become cold, dropping below freezing in some desert areas. As the landscape dries so the game in the north of the country gravitates more to waterholes, and is more easily seen by visitors. By **September and October** it warms up again; game-viewing in most areas is at its best, although there's often a lot of dust around and the vegetation has lost its vibrancy.

**November** is a highly variable month. Sometimes the hot, dry weather will continue, at other times the sky will fill with clouds and threaten to rain – but if you're lucky enough to witness the first rains of the season, you'll never forget the drama.

### *Clothing and Dress Recommendations*

Namibians have a somewhat relaxed attitude to dress codes. A jacket and tie is very unusual. In fact, long trousers and a shirt with buttons are often quite adequate for a formal occasion or work wear. A pair of sensible shoes, jeans and a t-shirt is recommended.

During the day it is generally hot, so pack light weight loose fitting clothes in natural fabrics, such as linen or cotton, that will keep you cool and are easy to wash and dry.

Keep in mind that the 'winter'-month will require you to take a warm set of clothes for the cold evenings.

### *Internet Availability*

Telecom Namibia offers a service called wi-space. You purchase a wi-space voucher that allows you to connect to WiFi wherever you see the wi-space logo (about 40 locations in Namibia).

Alternatively good WiFi access is available at most holiday accommodation venues across the country (free / paid).

### *Electricity and Plug Standards*

Electrical sockets in Namibia are Type M (SABS-1661). If your appliance's plug doesn't match the shape of these sockets, you will need a travel plug adapter in order to plug in. Travel plug adapters simply change the shape of your appliance's plug to match whatever type of socket you need to plug into. If it's crucial to be able to plug in no matter what, bring an adapter for all types.

Electrical sockets in Namibia usually supply electricity at 230 volts AC / 50 Hz frequency. If you're plugging in an appliance that was built for 230 volt electrical input, or an appliance that is compatible with multiple voltages, then an adapter is all you need. If your appliance isn't compatible with 230 volts, a voltage converter will be necessary.

### *General Guidance*

#### **Securities**

Explore Namibia is an official member of the NTB (Namibian Tourism Board). This is a government institution that oversees the quality of the tourism industry in Namibia. Furthermore, Explore Namibia is a member of the TASA

(Tourism Association Southern Africa). This organization monitors the observance of all kinds of rules in tourism in southern Africa.

At the moment of booking a 25% deposit is required. The outstanding amount is due 6 weeks prior to arrival in Windhoek. An official invoice will be send to you. This can also be used for arranging a travel and cancellation insurance.

Payment can be done directly on to our European bank account.

Situated in the southern reaches of Africa, Botswana is renowned for its pristine wilderness areas characterised by deep lagoons, wetlands, lush palms, rugged hills and desert plains. The country's primary tourist drawcard is undoubtedly the vast red expanse of the Kalahari Desert and its remarkably beautiful Okavango Delta, the largest inland delta in the world. These natural wonders provide a tranquil haven for an abundance of African wildlife to thrive. Other highlights include the impressive Makgadikgadi Salt Pans, where visitors are privy to massive zebra migrations during the flood season; the Savuti plains, which host a significant pride of lions; and the Tsodilo Hills, where 4500 rock paintings form a unique record of human settlement over many millennia.

### ***Banking and Currency***

#### **Currency**

Botswana's currency is Pula (which means 'rain' in Setswana). It is divided into 100 thebe (which means 'shield' in Setswana). Travellers' cheques and foreign currency may be changed at banks, bureaux de change and authorised hotels.

The US dollar, Euros, British Pound and the South African Rand are the most easily convertible currencies (and accepted by some establishments - but, generally, then an inflated rate of exchange will be applied).

#### **Banking**

Seven main commercial banks, as well as a number of foregin exchange bureaux, operate in Botswana. Operating hours are Monday to Friday 08h30 to 15h30 and Saturday 08h30 to 10h45.

Full banking services are available in major towns, although ATMs are sprouting up all over the country. Most credit cards are accepted at hotels and restaurants. Cultural sites and community art and craft outlets usually only accept cash.

### ***Travel, Transport and Getting Around***

Public transport in Botswana is geared towards the needs of the local populace and is confined to main roads between major population centres. Although cheap and reliable, it is of little use to the traveller as most of Botswana's tourist attractions lie off the beaten track.

Driving off the main roads in Botswana is only recommended to experts in 4x4 vehicles, that are equipped correctly. Most lodges offer transfers or they can be arranged. If, however, you will be driving in Botswana: your home driving licence will be accepted (with an official English translation if necessary; driving is on the left side of the road; and the national speed limit is on tarred roads is 120km/h and 60km/h in towns and villages.

### **Be sure to watch out for wild animals on the roads!**

There are major airports in Maun, Kasane and Gaborone, while smaller charter flights are used to get to the other top attractions and camps.

### ***Food, Drink and Cuisine Advice***

Safari lodges and camps serve international-style cuisine, generally of an extremely high standard, along with local beer and imported wine and spirits. Good restaurants and bars can be found in main towns, often within hotels. Beef and goat are very popular meats. Elsewhere, food is more basic: millet and sorghum porridge are the local staples.

Tap water is considered safe to drink, although outside main cities and towns, visitors are advised to check first and sterilise water if in any doubt. Bottled water is available in most tourist centres. Filtered water is available at most camps and shops offer bottled water - it is advised to be well stocked of bottled water if you are travelling off the beaten track. Milk is pasteurised, and dairy products, local meat, poultry, seafood, fruit and vegetables are generally safe.

A discretionary five-to-ten-percent tip is typical for restaurant bills. In many places, a service charge is automatically added. It is customary to tip the game guide and lodge staff while on safari.

### ***Climate and Weather***

Botswana's climatic pattern is typical of southern Africa, although its rainfall is less than countries further east. The rains in Botswana come mostly between December and March, when average minimum temperatures are in the low 20°s. Some days will be bright and sunny, some will have afternoon thunderstorms, and some will just be grey.

As with Namibia, April and May in Botswana are generally lovely, with the sky clear and the landscape green. Night temperatures start to drop during these months, especially in the Kalahari. Note that places in and around the Okavango tend to have less extreme, more moderate temperatures than the drier areas of the Kalahari.

From June to August the night-time temperatures in drier areas can be close to freezing, but it warms up rapidly during the day, when the sky is usually clear and blue. It's now very much 'peak season' for most safari areas: the land is dry in most areas so the animals congregate around the few available water sources.

This continues into September and October, when temperatures climb again, drying the landscapes and concentrating the game even more. This is the best time for big game safaris – although October can feel very hot, with maximum temperatures sometimes approaching 40°C.

November is difficult to predict, as it can sometimes be a continuation of October's heat, whilst sometimes it's cooled by the first rains; it's always an interesting month.

### ***Clothing and Dress Recommendations***

In summer, lightweight, lightcoloured cottons are preferable. Avoid synthetic materials and black clothing, as they increase perspiration and discomfort. In winter, wear trousers, longsleeved shirts / blouses and jerseys. From May – August, night temperatures can fall below zero degrees celsius, so warm jerseys and jackets are vital, especially on morning and evening game drives. Garments of neutral colours that blend with the bush and forest are advisable for

safaris and game viewing. Bring a lightweight jacket and/or jersey for unexpected temperature changes or rain. Closed, comfortable walking shoes or gym shoes are a must in all seasons. Special attention should be given to protection from the sun. Bring a sunhat, good quality sunscreen, sun lotion and polarised sunglasses. Wide brimmed sun hats are essential.

#### **Internet Availability**

Some hotels, lodges and guest houses offer internet access or WiFi (free or paid), and there are internet cafe's in Gaborone and Maun. Internet access in more remote rural areas is often hard to come by.

#### **Electricity and Plug Standards**

Electrical sockets (outlets) in Botswana are the 'Type M' South African SABS1661 ('Large' 15 amp BS-546) sockets. This is actually an old British standard. The 'Type M' South African plug and socket is not to be confused with the 'Type D' Indian plug and socket. In pictures, they look very similar, but the South African type is much larger than the Indian type, and they are physically incompatible. If your appliance's plug doesn't match the shape of these sockets, you will need a travel plug adapter in order to plug in. Travel plug adapters simply change the shape of your appliance's plug to match whatever type of socket you need to plug into.

Electrical sockets (outlets) in Botswana usually supply electricity at between 220 and 240 volts AC. If you're plugging in an appliance that was built for 220-240 volt electrical input, or an appliance that is compatible with multiple voltages, then an adapter is all you need.

But travel plug adapters *do not change the voltage*, so the electricity coming through the adapter will still be the same 220-240 volts the socket is supplying. If you need to use appliances that are not compatible with 220-240 volt electrical input, you will need a voltage converter.

A nation of spectacular natural beauty, friendly people and rich culture, Zimbabwe's status as one of Africa's leading safari destinations was dampened for years by its political instability. But now that the country is transcending its strife and returning to a state of equilibrium, it is once again emerging as a vacation highlight of the continent. Victoria Falls – known to locals as 'The Smoke That Thunders' – is one of the seven natural wonders of the world and the sheer power of this massive body of water plunging into the Zambezi Gorge is awe-inspiring and unforgettable. Lake Kariba, with its game-rich shores and islands, is an idyllic safari spot featuring mind-blowing sunsets; Hwange National Park is known for its huge herds of elephants; and a kayak trip down the Zambezi through the Mana Pools National Park will appeal to the intrepid traveller, providing close encounters with crocodiles, hippos and a host of other wildlife.

## ***Banking and Currency***

### **Currency**

US dollars are universally accepted as well as South African rands, euros and pounds sterling.

The official currency of Zimbabwe is the Zimbabwe dollar (ZWL). This currency is in the form of \*Bond Notes and \*\*RTGS (real time gross settlement). The currency consists of bond coins and banknotes, with denominations including 1, 2, 5, 10, 20, and 50 bond coins, as well as 2, 5, 10, 20, 50, and 100 dollar banknotes. The currency was reintroduced in 2019 and even though the Zimbabwean dollar is still accepted and in circulation, the US dollar is the dominant currency.

It's important to note that exchange rates and the use and value of the Zimbabwean dollar can fluctuate, so it's advisable to check with official exchange bureaus, banks, or financial institutions for the most up-to-date information and rates for travel to Zimbabwe.

### **Banking**

Banks in Zimbabwe are open for business Monday, Tuesday, Thursday and Friday from 08h00 to 15h00, on Wednesdays from 08h00 to 13h00 and Saturdays from 08h00 to 11h30. They are closed on Sundays and Public Holidays.

Only VISA and MasterCard are accepted in Zimbabwe, however it should be noted that very limited facilities will have credit card machines, and the connection is not always reliable so it is advisable to carry cash as back up.

### ***Travel, Transport and Getting Around***

Taxis are safe and reliable, and can be booked through your hotel front desk. Taxis in cities travel within a 40km radius of the city. Always take a taxi at night.

Major airlines fly into Victoria Falls, Harare and Bulawayo. Charter flights are available to most attractions and camps.

Zimbabwe has a good road infrastructure, by African standards, although potholed. Between major towns, there are frequent road blocks. Traffic drives on the left side of the road.

If you are driving yourself around Zimbabwe, be sure to check on fuel availability in advance. If you are covering long distances within the country, ensure you carry extra fuel in 5 or 10lt metal containers in case of emergency. Fuel is generally available, but supply can fluctuate. Fuel is only available for cash.

### ***Food, Drink and Cuisine Advice***

Zimbabwe's native cuisine is based on sadza, a cooked porridge made from ground maize which is normally accompanied by some tasty relish, perhaps made of meat and tomatoes, or dried fish. Safari camps will often prepare sadza if requested, and it is almost always available in small restaurants in the towns.

Camps, hotels and lodges that cater to overseas typically serve a variety international fare, and the quality of food prepared in the most remote bush camps is usually excellent.

If you are driving yourself around and plan to cook, then get most of your supplies in main towns. There are a number of South African shopping chains operating in Zimbabwe which will generally have all that you will need.

Water in the main towns is usually purified.. The locals drink it, and are used to the relatively innocuous bugs that it may harbour. If you are in the country for a long time, then it may be worth acclimatising yourself to it. However, if

you are in Zimbabwe for just a short period of time, then try to drink only bottled, boiled, or treated water available in towns and from all camps, lodges and hotels.

### *Climate and Weather*

In Zimbabwe, the rains come principally in **December, January, February** and **March**; the further north you are, the earlier the precipitation arrives and the later it leaves. Zimbabwe's higher eastern areas usually receive more rainfall than the lower-lying western ones.

By **April** and **May** most of the rain is gone, leaving a verdant setting, which is starting to dry out. Especially in more southerly and higher locations, the night-time temperatures start to drop.

The nights in **June, July** and **August** become much cooler, so don't forget to bring some warmer clothes, in case you want to spend an evening outside; the days are still clear and warm. For Zimbabwe, this is the start of the 'peak season'— days are often cloudless and game sightings continually increase.

Into **September** and **October** the temperatures rise once again: Zimbabwe's lower-lying rift valley – Mana Pools – can get very hot in October. During this time, you'll see some fantastic game, as the Zimbabwe's wildlife concentrates around the limited water sources.

**November** is unpredictable; it can be hot and dry, it can also see the season's first rainfalls – and in this respect it's a very interesting month, as on successive days, you can see both weather patterns.

### *Clothing and Dress Recommendations*

When in Zimbabwe the cardinal rule is to wear casual, comfortable clothes during the day as temperatures can get very hot. It is advisable to wear light loose-fitting clothing, such as cotton or linen, as they are cool and easy to wash. Warmer clothes are advised for the evenings and rainwear for the wet season.

A brimmed hat and sunglasses are a good idea year-round. Long-sleeved shirts and long trousers will also guard against the scorching sun rays. It is recommended you wear light shoes, especially if your itinerary entails a lot of walking.

For safaris, please remember to wear appropriate clothing and shoes. Earth colour clothes, such as browns, greens and tans are advisable.

### *Internet Availability*

Internet availability is very limited especially outside of the major cities.

Most holiday accommodation venues offer internet and/or WiFi (free or paid) to their guests but there are often disruptions in service.

### *Electricity and Plug Standards*

Electrical sockets in the Republic of Zimbabwe are Type G (BS-1363) and Type C (CEE 7/16 Europlug) and Type D (BS-546). If your appliance's plug doesn't match the shape of these sockets, you will need a travel plug adapter in order to plug in. Travel plug adapters simply change the shape of your appliance's plug to match whatever type of socket you need to plug into. If it's crucial to be able to plug in no matter what, bring an adapter for all types.

Electrical sockets usually supply electricity at 230 volts AC / 50 Hz frequency. If you're plugging in an appliance that was built for 230 volt electrical input, or an appliance that is compatible with multiple voltages, then an adapter is all you need. If your appliance isn't compatible with 230 volts, a voltage converter will be necessary.
